Intro to project management

Beginning
- Initiating: What do I want to do
- Planning: How am I going to do it

Middle
- Execution: Execute the tasks planned
- Monitor and Control: Checkup and pull selves back

End
- Closing: Deliver the outcome of the project. Know what is right and wrong and what to improve.

Waterfall approach
Initiate → Plan → Design → Code → Test → Release → Review

Agile: Working with iterations
Iteration1→ Product increment 1 → Iteration 2 → Product increment 2 → Iteration 3 → Final
During iterations, do waterfall approach for smaller updates on the project
